Amazon invests in self-driving company Aurora

Amazon has invested more than \$530 million in the autonomous driving start-up Aurora. Other investors include the investment division of Shell.

Aurora was founded by CEO Chris Urmson, the former CTO of self-driving cars at Google parent company Alphabet. Co-founder and Chief Product Officer Sterling Anderson led the design and launch of the Tesla Model X and Drew Bagnell, a former engineer and co-founder, was one of the founders of Uber's Advanced Technology Centre. Aurora works with car manufacturers to develop self-driving technology. It has partnerships with Ford and Cruise (GM).

Could Google, Apple and Intel be the next big car manufacturers?

By Sam Forsdick 25 Feb 2019

Tech companies such as Google, Intel and Uber are having a growing influence on the traditional car manufacturing market, according to a GP Bullhound report on global autotech
